

About myself. If there is a just word that describes what I have, without appearing vain, it is “experience”. Experience gained by many years of dedication to drawing, painting, illustration, etc.

I want to show you on this page, a selection of images based on various themes. I am using my first Christmas cards, and many comics, that I produced using traditional techniques (ink, tempera, oil, etc.), and later combined with computer tools, to finally create digital images. I am continuing to work on this process at the moment.

From my studio in Alicante, with drawings and illustrations distributed through specialized agencies in Europe, USA and Canada, I am able to show you a few of my published works such as Covers, DVDs, Puzzles etc.

Another aspect of my work is Animation. I enjoy making short films from my own creations - even from my paintings, which are more difficult to animate. I work hard on these films, because giving my images movement adds a real new dimension to my work.

I currently give classes in drawing and painting, and even use digital techniques when teaching.
